Product Design BSc
(Pending)

A Levels

Design Technology
Information Systems
Mathematics Mechanics
Physics (AS Level)

“Being awarded the Arkwright Scholarship was the beginning. It sparked my imagination and passion for design. This motivated me to pursue a career in the field and has led me to Bournemouth University where I am currently finishing up my Product Design BSc degree and am excited to see what the future holds for me”.

Having achieved the required grades from St Cyres Comprehensive School, Jun continued to pursue his design career at Bournemouth University. There he is currently studying Product Design BSc and will be completing his degree at the end of June 2011.

Anglepoise: Revelar Table Concept

At Bournemouth University Jun has been able to develop his skills as a designer both technically and creatively.

These skills have led him to achieve high grades in projects with live briefs set by Anglepoise, Jaguar and Spinning Hat.

In 2009, Jun secured a 10-month internship at design consultancy Daifuku Designs in Barcelona. There he was working directly with Jonathan Daifuku within various design sectors such as; Architecture, lighting design and furniture design.

His role was to help develop concepts, prepare CAD models and importantly realise their market potential.

Whilst at Daifuku Designs, Jun was able to work with companies such as: Louis Vuitton, Carpyen, Mondano Colomer.
